Issue 06

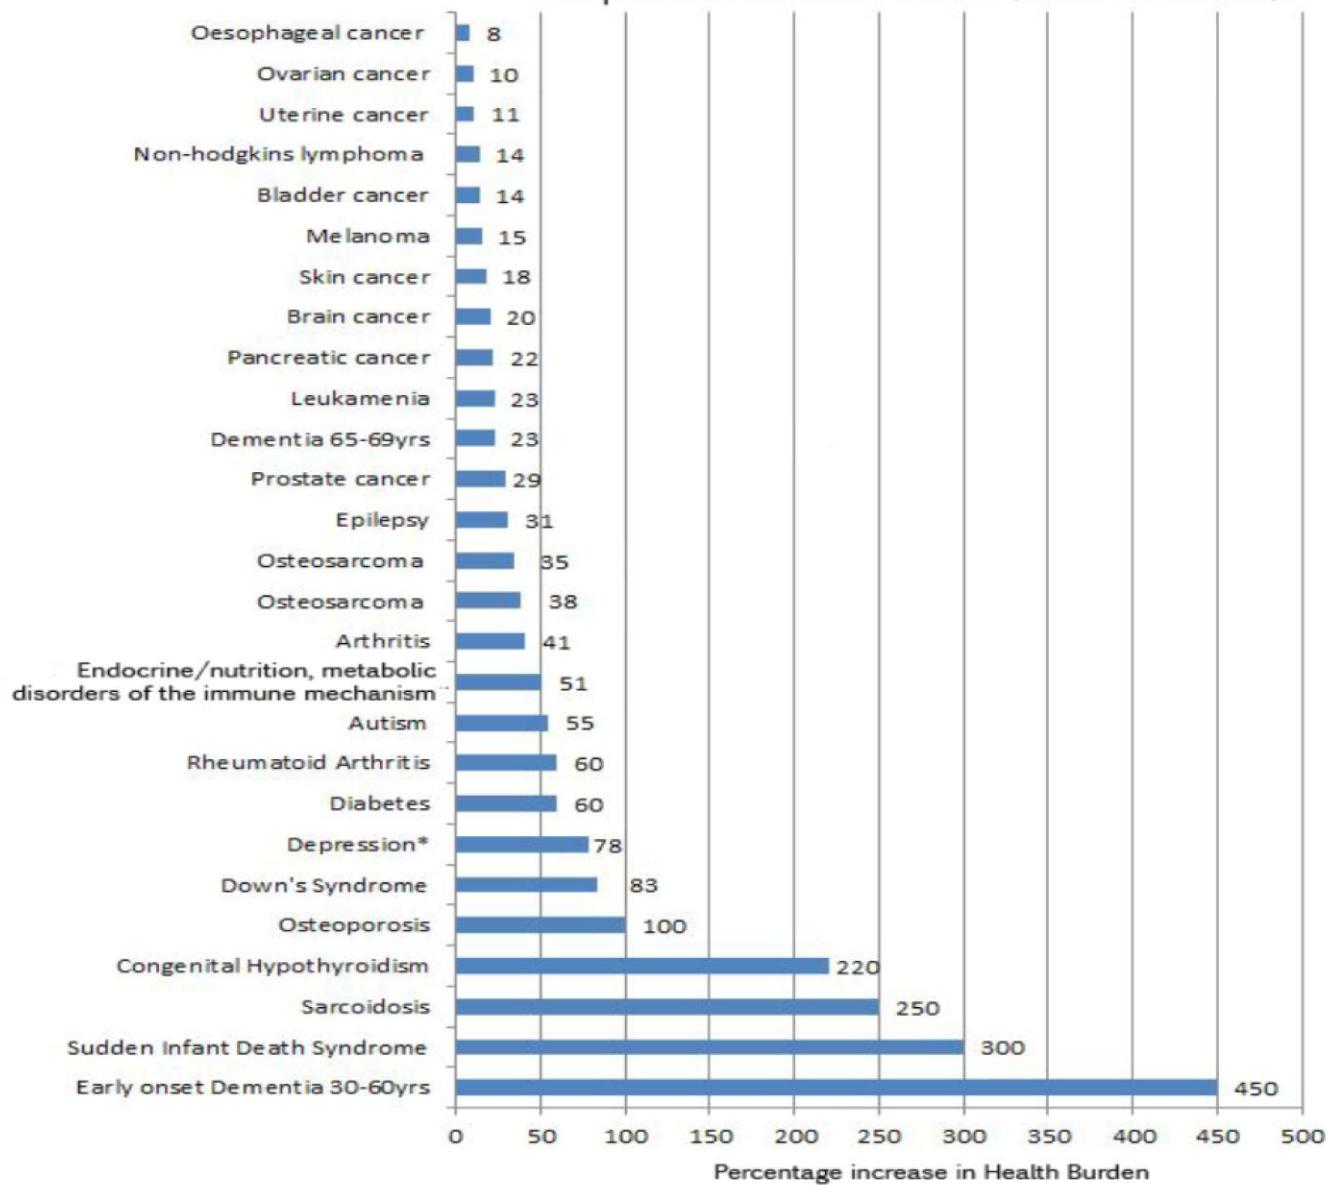

To understand this chart, please refer to the background information given in KFIN Issue-05.

other health concern. Therefore, there is no opposing chart. Rather, in every instance, the fluoridated population suffers the adverse health effects of fluoridation as shown. # # #

Note that in this study, ingested fluoride has not been shown to improve any cancer or

Figure 1. Variation in Disease Burden for Population of Republic of Ireland (Fluoridated) compared to Northern Ireland (Non-Fluoridated).

Note: Where increased incidence is recorded for either male or females in certain instances, such as for cancers, the highest percentage increase is presented for either sex. Where data is not available for NI, UK data is provided.

\* Data from AWARE ROI/NI and Health Promotion Agency UK. Further information included in report. Ireland has highest incidence in EU of Prostate cancer, Non Hodgkins lymphoma and Ovarian cancer.
